

FYDP-I Proposal Defence Evaluation Rubrics

S. No.	Criteria	Mapping	Not Addressed (0)	Marginal (1)	Adequate (2)	Good (3)	Very Good (4)	Excellent (5)
1	Understanding of problem domain (2 Marks)	PLO 1 Engineering Knowledge	No understanding	Very little understanding regarding problem domain	Understanding regarding some aspects of the problem domain requiring clarification	Clear understanding of many aspects of the problem domain; not clear about some aspects	In between	Clear understanding of all the aspects of the problem domain.
2	Preliminary Review (Literature/Related applications) (1 Mark)	PLO 2 Problem Analysis	Not discussed	The presented evidence is of low relevance with questionable accuracy	The evidence is relevant, accurate and covers several aspects of the project.	Good coverage with relevant and accurate support.	In between	Evidence is with higher degree of relevance and originality.
3	Problem Statement (2 Marks)	PLO 6 The Engineer and Society	Problem statement not included	The description of the project problem statement is unclearly addressed.	The description of the project problem statement is somewhat addressed	The description of the project problem statement is generally addressed.	In between	The description of the project problem statement is clearly addressed
4	Validity/effectiveness of proposed solution (2 Marks)	PLO 3 Design / Development of Solutions	solution has no correlation to the problem statement.	Solution is ambiguous	Solution solves problem 50-60% aspects of problem statement effectively	Solution solves problem 60%-70% aspect of problem statement effectively	In between	Solution solves problem in most effective manner using proper techniques
5	Scale of the project (no of modules, difficulty level, skill set required etc.) given the team's size. (2 Marks)	PLO 3 Design / Development of Solutions	student is absent	scale is too small for a FYP given the team size	adequate project scale with bare minimum no. of modules and/or difficulty level; requires addition of project relevant modules.	good project scale with enough modules and working required; a few necessary modules need to be added.	In between	scale of the project (no of modules, difficulty level, implementation level etc.) is ideal given the team size and proposed solution
6	Innovative Idea (1 Mark)	PLO 6 The Engineer and Society	student is absent or no new feature or differences mentioned.	Presented solution is a replica of the existing solution with at least 20% new features	Presented solution is a replica of the existing solution with at least 50% new features	Presented solution is a replica of the existing solution with at least 70% new features	In between	Presented solution is a novel idea
7	Coding effort required (1 Mark)	PLO 3 Design / Development of Solutions	student is absent, or the project requires no coding effort.	only existing APIs may be integrated to develop a solution with almost no coding contribution involved.	Requires some coding effort; mostly existing APIs integrated to develop the project.	requires good coding effort	In between	significant coding effort and skills required to develop the application.

8	Motivation behind tools and technologies (1 Mark)	PLO 5 Modern tool usage	No understanding	Very little understanding of the suitable tools and technologies applicable to the problem domain	Some understanding of the suitable tools and technologies applicable to the problem domain	reasonably good understanding of the suitable tools and technologies applicable to the problem domain; some details still not clear.	In between	Clear understanding and usage of latest tools and technologies applicable to the problem domain
9	Relevance with UN SDGs (1 Mark)	PLO 7 Environment and Sustainability	No correlation with UN's SDGs	Marginal correlation in attaining SDGs	Adequate correlation in attaining SDGs	Good correlation in attaining SDGs	In between	Excellent correlation with one or more SDGs
10	Student attire & presentability (1 Mark)	PLO 10 Communication	student is absent	Student's attire is barely acceptable	Student's attire is appropriate	Student's attire is good	In between	Student's attire is excellent
11	Effective Communication (2 Marks)	PLO 10 Communication	student is absent or did not present is he/she is there.	Answer at least one question correctly. Need clarification.	Answer some questions correctly. Need clarification repeatedly.	Answer many questions correctly; need clarification sometimes.	In between	Handles difficult questions with ease and confidence.
12	Preparation and organization (2 Marks)	PLO 9 Individual and Teamwork	not prepared at all	Bare organization and preparation. Lack of confidence and familiarity in some parts of the presentation.	Basic organization and preparation. Confident in only some parts of the presentation	Good organization and preparation. Confident in most parts of the presentation.	In between	Excellent organization and preparation. Confident and relaxed in the whole presentation
13	Is the scope document well formatted and grammatically correct? (1 Mark)	PLO 10 Communication	not submitted	The document is poorly formatted, is full of grammatical and content related mistakes.	The document is partially formatted with a few grammatical mistakes; no caption label and numbering provided for tables, figures etc.	The document is reasonably well formatted with few grammatical mistakes; same caption label used for tables, figures etc.; requires some improvements.	In between	A complete, concise, and well-formatted report; separate captions and numbering provided for all tables, figures etc; separate table-of-contents provided for figures, tables etc and for the entire document
14	Is the scope documentation & presentation free of Plagiarism? (1 Mark)	PLO 8 Ethics	document or presentation contains higher than 30% similarity, or not submitted, or the student is absent.	The Scope document and presentation contain similarity between 25-30%	The Scope document and presentation contain plagiarism between 20-25%	The Scope document and presentation contain plagiarism between 15%-20%	In between	The Scope document and presentation have a similarity score of less than 10%
